Typical Registration Fee Per Event

Thousands of Indian researchers lose money every year to **unverified academic conferences** — events that charge registration fees, promise peer-reviewed publication, and deliver nothing of academic value. There is currently **no automated, reliable tool in India** that allows a researcher to verify a conference's credibility before paying.

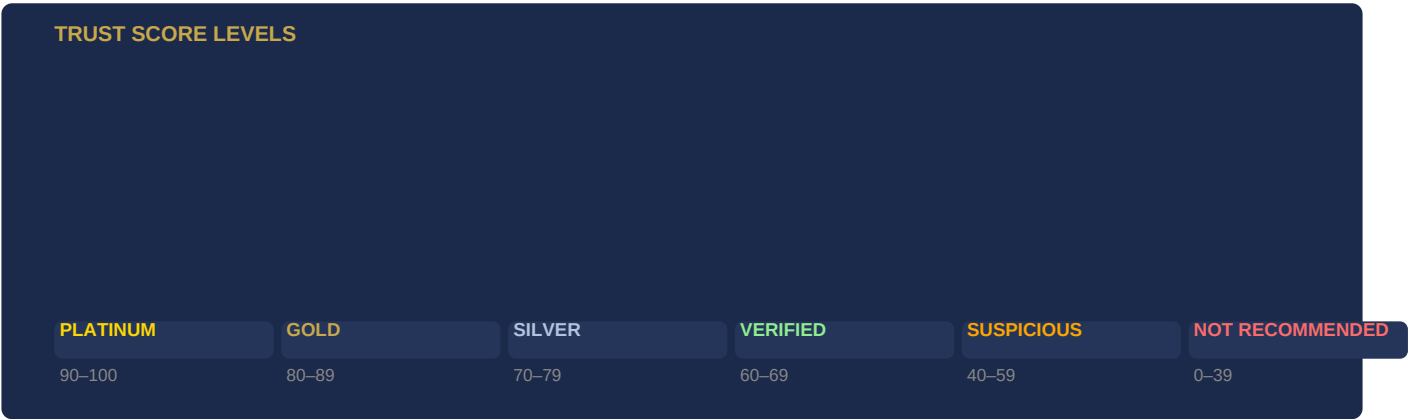

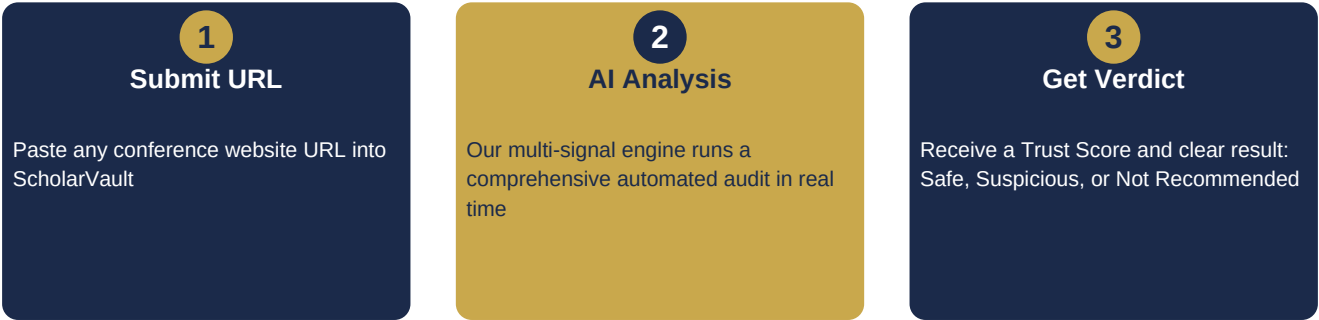

Researchers are left entirely dependent on word-of-mouth or time-consuming manual searches with no standardised methodology. The result is financial loss, wasted research time, and lasting damage to academic credibility.

- **Financial Loss:** Registration fees paid to events that never deliver promised publication or
- **Career Risk:** Research listed in non-credible venues can damage promotion and funding pro
- **No Verification Tool:** No existing Indian platform automates conference credibility checks at scal

Verify Before You Register

ScholarVault is a real-time AI-powered platform that analyses any academic conference URL and delivers an instant credibility verdict. No expertise required. No waiting. No guesswork.

Built, Live and Serving Re

ScholarVault is not a concept or prototype. It is a fully open source application, serving individual researchers across India today.
